ABOUT US

Orient Polypack Pvt. Ltd. stands out as a dynamic, technology-driven company specialising in tailor-made packaging solutions. Our long-term success depends on staying committed to high standards of quality and productivity, working together efficiently, and always being open to new ideas and learning. We believe in acting ethically with everyone we work with, the communities we impact, and the environment. This approach helps us grow sustainably and profitably, creating long-term value for our people, business partners, and society.

At Orient Polypack, strong leadership means being versatile. We constantly improve our skills and capabilities across different areas, regions, and products. Our comprehensive range includes PP/HDPE woven sacks/bags, woven fabric, tarpaulin, and pond liners. With a monthly capacity of 2.5 million bags, our vertically integrated plant is fully equipped with cutting-edge extruder machines for weaving, printing, lamination, cutting, and stitching. Additionally, we boast advanced R&D and quality control labs, conducting rigorous tests on parameters such as weight, tensile strength, UV protection, and gauge to ensure product quality.

Our state-of-the-art machinery and skilled workforce enable us to efficiently fulfil bulk orders within specified timelines. Our commitment is to design and deliver reliable, durable, and cost-effective packaging solutions for various industries including food products, animal feed, chemicals and fertilisers, petrochemicals, engineering and industrial products, cement, polymers, and retail, among others. We prioritise consistent quality, competitive pricing, and punctual delivery.

Experience modern excellence at Orient Polypack, where our infrastructure reflects our commitment to quality. From sourcing materials to manufacturing, quality control, research and development, and meticulous warehousing and packaging, we handle every step meticulously. Under the guidance of our seasoned experts, we deliver superior service, meeting bulk and urgent orders with efficiency and precision. Explore our premium range of packaging solutions, including bags, sacks, and covers, trusted for their quality and durability.

APPLICATION AREA

We are engaged in offering quality packaging products such as bags, sacks and covers. Owing to high quality standards, our range of material is successfully used in the packaging of various consumable products. The packaging material has application base in packaging of following products:

- Fertilizers
- Cement
- Sand
- Food grains
- Sugar
- Animal feed
- Fish meal
- Pulses
- Spices
- Agro products
- Minerals
- Resin
- Polymers
- Rubber
- Salt
- Various FMCG products

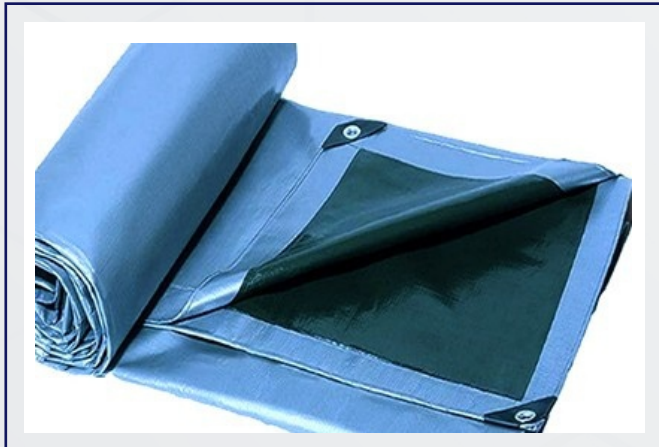

PP / HDPE

We offer our clients a diverse selection of PP/HDPE Woven Sack Bags suitable for packing various products. Designed in accordance with international quality standards, our products ensure reliability and durability. Additionally, we offer customization options to meet specific client requirements. With an in-house production facility, we can manufacture bags in a range of sizes and widths, from 18" to 72" (in tubular form), with mesh sizes ranging from 6x6 to 14x14 and Denier options from 600 to 1500. Our fabric is available in various colours to suit different preferences. Our focus on quality ensures that our packaging products, including bags, sacks, and covers, are trusted for packaging a wide range of consumable products, providing numerous benefits.

TARPAULINS

With our extensive industry expertise, we excel in fulfilling the manufacturing and export demands for high-quality Tarpaulins. These robust, waterproof sheets, known for their flexibility and water resistance, are available in canvas or polyester base cloth options, as well as HDPE fabric. For enhanced usability, we offer reinforced grommets at corners and along sides, facilitating efficient use with ropes. Leveraging our process and product knowledge, we provide Tarpaulins in a variety of shapes, designs, and colours to suit diverse preferences. Our range includes Tarpaulin covers, HDPE Tarpaulin, and waterproof Tarpaulins.

POND LINER

Our Pond Liners are designed to create durable and reliable water containment solutions for ponds, lakes, and other water features. Crafted from high-quality materials, our liners offer superior strength and durability, ensuring long-lasting performance in various environments.

BOPP LAMINATED BAGS

Establishing a distinctive position in the market, we specialise in offering customers uniquely designed BOPP Bags. Our product range also includes Shopping Bags, Front and Back Match Reverse Printed Bags, Reverse Printed Bag with Handle, Reverse Printed Polyester Bag with Gusset, Surface Printed Bags, and Back Seam Easy Opening Bags, among others. Crafted in accordance with current industry trends, our bags are made from high-quality materials sourced from trusted vendors. As a result, our bags are recognized for their moisture and tear resistance, durability, and strength.

Online Printing & Cutting	1,60,000 Per Day
Online Cutting & Stitching Machine	1,50,000 Per Day
Tarpauline sealing Machine	120 MT Per Month
Pond Liner Fabric	120 MT Per Month
Leno Bag	100 MT Per Month

WHY US

We are preferred by the clients for PP/HDPE packaging material over our competitors, due to the following reasons :

- **Quality as per the International standards**
- **Dedicated and proficient team of engineers and sales representatives**
- **Use of superior quality raw material**
- **Customized products as per the clients requirements**
- **Integrated Infrastructure**
- **Wide network of distributors in our region**
- **Free sampling policy**
- **Quality services**
- **Competitive price**
- **Timely delivery**

QUALITY ASSURANCE

Quality at Orient is a result of sincere efforts, intelligent direction and skillful execution of the entire process. We follow well defined quality management system right from the procurement of the raw material till the final dispatch of the products. The selected material used for the production is treated with the UV stabilizers to resist damage caused by ultra-violet rays. All the stages of production are strictly supervised by experienced quality control professionals, who ensure flawless execution of the task.

Backed by high-tech machines, our production unit leads to consistent innovation and improvisation. We use latest sewing machines that guarantees safety and long-lasting stitch. The indelible ink is used to achieve better printing quality and clarity. The final batch of product is approved for delivery only after uncompromising fault-finding and inexorable testing and inspection.

We assure our clients prompt services and timely delivery of products in ou region.
